

# *Our Learning Adventure*

## Summer Term 2

In nursery, we talk to the children about 'going on an adventure'. This relates to the learning that they will be doing through their play. This term we will be going on the following adventures:

We will be asking 'Where in the world can we go?' We will be finding out all about the jungle, desert, ocean and many areas of the world and the people that may live in those places. We hope to open the minds of the children to a wider, bigger world and an excitement to explore and find out about places familiar and unfamiliar to them. We will be focusing on different forms of transport too: You might like to talk about the different transport that you use or even travel on a bus or train

together!

Our core story this half term is 'Walking Through the Jungle'.

We will explore all the different animals that live in different places around the world through this story, enjoying the rhythm and rhyme of the text and describing where the creatures live and how they move.

You might like to enjoy this song version together.

[Walking Through the Jungle | Barefoot Books Singalong \(youtube.com\)](#)

You might also like to make up your own version together. E.g. 'Walking through the park...' or 'Walking through the town...'

In nursery we will be looking at measure in maths. We will be learning to use tricky concepts such as big/small, tall/short, full/empty and even heavy/light! We will be talking about how we can order items according to size, weight or capacity through our play indoors and outdoors. You could support this learning by using these words at home or even measuring you and your child – who is taller or shorter?

We will be supporting the children to develop their spoken vocabulary as we adventure this term. Our special words this term are **explore, think, chase, walk, creep, leap, trek, summer, hot**. It would be great if you could be using these words at home with your child as you chat, play and read together. This will really help to develop your child's language and understanding.

Don't forget that you can tell us about what your child is learning at home using
